Welcome Message

I take this opportunity to thank our valued customers, whose continued patronage and confidence in our products and services inspire us to extend the best of our services. We move ahead with the following values embedded in our work. Innovate, Imbibe, Excel and Shift the Paradigm.

We innovate, embrace best practices, and prioritize social responsibility. Our talented team creates apps to elevate customer satisfaction and benefit the community

Muhammad Arshad

CEO

ARFA
DEVELOPERS
Keep Internet Solutions Simple

About Arfa **Developers**

Arfa Developers was founded by tech enthusiasts with expertise in iOS, Android, Windows, Web, and Ethereum Blockchain.

We'd consider it an injustice if our solutions and services aren't able to give you an idea of the affinity that we have for the world of development and IT consultancy

Our Vision

Provide world-class consultancy for fast, robust, and scalable web, mobile, and Blockchain products.

Dedicated Team Model

Dedicated teams offer focused expertise and seamless collaboration.

Dedicated Developer Model

The dedicated developer model ensures focused attention and efficient delivery.

How We **Work**

We make sure that no two development processes are the same and we develop efficient engagement models that are by the varied and dynamic business needs.

At Arfa Developers, we provide two flexible engagement models to ensure the perfect fit for your project needs.

Benefits of choosing engagement models

01 No complexities

02 Transparent Quotes

03 Secured development environment

04 No compromise with Quality

05 Close-knit support

06 Standardized Approaches

AFFA DEVELOPERS
Keep Internet Solutions Simple

How We Work

You are free to make a choice. Choose from our two engagement models that suit you best.

ARFA DEVELOPERS
Keep Internet Solutions Simple

Dedicated Team Model

A dedicated team is a model for long-term collaboration between a client and the development team. Within this format, a team of developers is focused on a client's project with the guarantee that no team member will be switched to another project. This is what the "dedicated" part implies.

Hire skilled developers

At Arfa Developers, we understand that every project is unique, so we offer a tailored approach to team composition.

Our dedicated teams offer specialists in various areas including development, design, and management.

Dedicated Team **Model Work Process**

Requirement Analysis

At Arfa Developers, we tailor your development team to your project needs and budget, ensuring skilled resources and successful outcomes.

Agreement Execution

At Arfa Developers, we ensure project confidentiality with signed agreements and top-tier security measures.

Work Allocation

With our flexible approach, you decide the projects and duration for your developers. We adapt to your needs, whether short-term or long-term.

Project Execution

We use agile tools like Jira, Confluence, Slack, and Trello for efficient communication and progress tracking.

AFFA DEVELOPERS
Keep Internet Solutions Simple

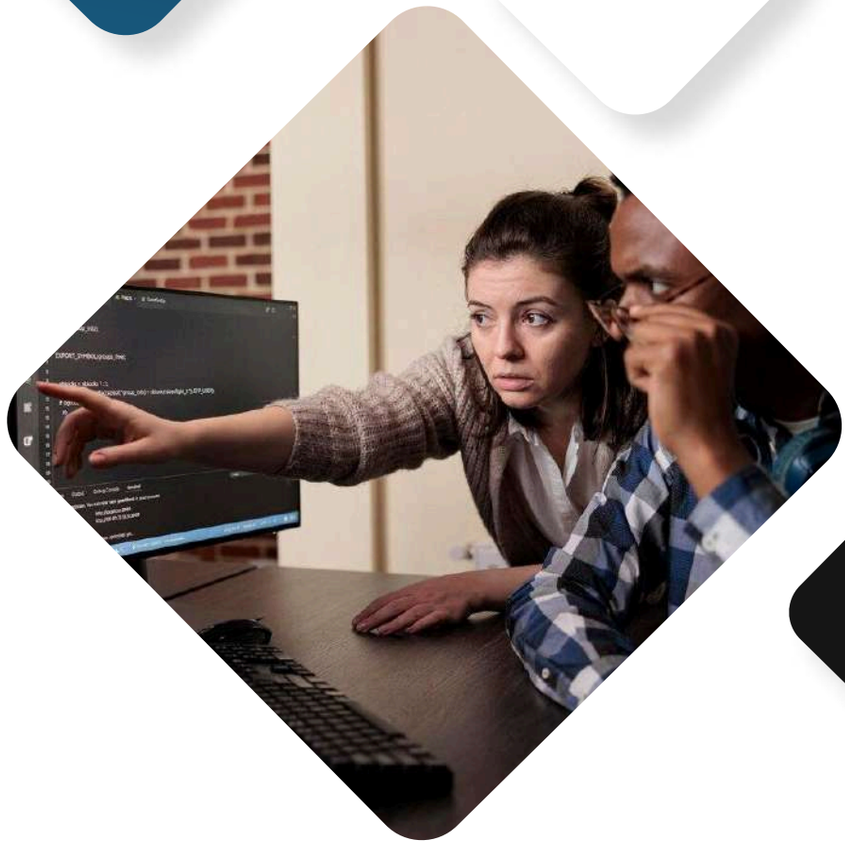
Why Hire Dedicated Developers?

Forget about the expensive recruitment process

The cost of hiring a dedicated team is transparent, as you don't have to worry about unpredictable expenses in selecting, vetting, and assembling IT specialists in a team – we do that for you.

Benefit from quick and easy ramp-up

The team's setup takes little time as our IT experts already have a mutual understanding from successfully working together on similar engagements and can focus on quickly integrating into your development process.



AFFA DEVELOPERS
Keep Internet Solutions Simple

Don't adapt alone to remote work.

We adapt to your communication model and set up collaboration tools seamlessly.

Retain ownership and access expertise.

We share best practices and project knowledge with your team.

Control results without daily management.

We provide a dedicated project manager for streamlined communication, freeing your time for core project tasks.

Hire Your Team Now

What is Dedicated Developer Model?

The dedicated developer model offers flexible access to skilled developers, allowing clients to scale teams as needed for timely, high-quality code.

Hire talent for your project

With over 10 years of experience, Arfa Developers delivers exceptional software development results through our expert team.

We follow global quality standards to ensure that our solutions meet the highest quality benchmarks and exceed your expectations

AFFA DEVELOPERS
Keep Internet Solutions Simple

Engagement Options in Our Model

Full-Time

Developer works exclusively on your project, 8 hours/day, 5 days/week. Payment hourly or fixed

Part-Time

Developer works 4 hours/day, 5 days/week on your project. Payment hourly or fixed.

Pay-Per-Hour

Developers works on tasks 5 days/ week. Billing is based on consumed hours multiplied by the hourly rate.

Partner with innovative coders

Our developers have been trained to anticipate future technical challenges that may arise due to the current development approach. By hiring our skilled developers, you can ensure that your development work is future-proofed and that any potential barriers can be easily overcome

In addition to our forward-thinking developers, we offer 7/24 support and adhere to global quality standards to ensure that your project meets the highest standards of excellence. We also offer time-zone compatibility and resource backup for absence and replacement policies.

Why Choose Our Developers?

Our dedicated developer model offers businesses a range of benefits that make it an attractive option for enhancing their development capabilities. By hiring our dedicated developers, businesses gain access to top industry talent with extensive experience in leading projects.

Our services come with a range of advantages that make it a smart choice for businesses seeking to save costs while ensuring top-quality results. Our pricing is fair and competitive, allowing for cost savings of up to 40% on development, maintenance, and support.

AFFA
DEVELOPERS

Our Development **Process**

Sketching Your Idea

When clients show interest, strategists kick off the project. Once the team agrees on an idea, we dive in.

Analyse & Prototype

After approval, we begin pre-engineering, covering analysis, strategy, and resource planning.

Design (UI/UX)

We prioritize functional design for an addictive, intuitive user experience.

Development / Implement

We use Jira, GitLab, Click Up, and Hub staff for project management. Developers optimize code continuously.

Testing & Assurance

We bring your website or app to life, testing each module rigorously for optimal results.

Deployment & Launch

After thorough testing and quality assurance, we deploy the end product to app stores and web browsers, ensuring compliance with store standards.

AFFA DEVELOPERS
Keep Internet Solutions Simple

Our Project Communication

Project Analysis

We listen to client requirements, plan and then move to initial development. We share the project SRS with our website team for detailed analysis, research, and design workflow.

Project Meetings

Facilitating collaborative sessions to align stakeholders, track progress, address challenges, and ensure effective communication for streamlined project management and delivery.

Clear, concise info

From day one, our team maintains clear, concise, and correct communication with clients and within the project team.

Single Point of Contact

We ensure clear communication through a single point of contact, while allowing flexibility for client inquiries

Multi-channel communication.

We use Skype, email, calls, meetings, and messaging for client communication, with both written and verbal methods as needed.

Project workflow access

We document project details for easy access via shared folders or tools like Jira, keeping everyone informed of project workflow.

AFFA DEVELOPERS
Keep Internet Solutions Simple

Our Project Communication

Privacy & Security

We ensure strict confidentiality of project details and client information among all team members, adhering to privacy policies.

Modern PM tools

We use tools like Jira, GitLab, Click Up, and Hub staff for efficient project management, enhancing accessibility for clients and team members.

Proactive & Upfront

We promptly notify the Project Manager and client of any challenges during development and work on finding solutions without delay or avoidance.

Complete Documentation

We document all discussions for easy reference, including procedures, feedback, and resources, preserving emails and Skype chats for future use.

Weekly/Fortnightly Reviews

We believe that regular review of work is important to maintain quality. According to clients' convenience and project requirements, we schedule meetings on a weekly or fortnightly basis

Status Reports

After each development phase, we send a project status report to the client to share what has been developed and what is pending and to know the feedback and any changes if required in between.

AFFA DEVELOPERS
Keep Internet Solutions Simple

Quality Assurance

We develop right the first time ensuring the highest quality.

Committed to deliver and deploying with zero bugs.

Independent quality assurance & testing for desktop, web, and mobile.

Bug-free, functional services that deliver maximum value with modern tools for automation testing.
Without an integrated approach to quality assurance services, we leverage diverse testing types including Unit, Manual, UI Automation, and Parallel to increase end-user satisfaction and loyalty for our clients.

We perform extensive testing throughout the entire development lifecycle and strive to continually decrease any non-conformance in software, apps, and websites using product reports as monitored at each management review. Some of our most reliable services at each phase of designand development include:

- Web Application Testing
- Test Automation
- Functionality & Usability
- Cross-browser Testing
- Testing
- QA Consulting
- Desktop/Mobile App
- Performance Testing
- Integrated Systems Testing
- Cloud-based Testing
- Device Compatibility
- Security Prototype Testing
